LET'S GLOCALIZE – COMMUNITY FOUNDATIONS DRIVEN BY SDGs SPIRIT

SDG 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Why is it important?

Innovation is the development and later implementation of concepts that increase the efficiency of production and the quality of goods or services. It is thanks to innovative solutions that we are able to make the development of the economy independent from the constant increase in the consumption of natural resources.

As a result, business innovation not only directly benefits employees and consumers, but entire societies and the environment.
